Vulcan Wins Home Tournament

Vulcan was the center of attraction on Dominion day and Champion was practically deserted. The programme of sports was evidently enjoyed by those who attended, everyone expressing themselves pleased with the trip. Champion won from Staveland in the baseball tournament by a score of 8-2, losing in the final to Vulcan by a score of 9-8, after maintaining a five run lead up to the sixth innings Kilen pitched in the first game and Siler in the second, R. H. Nelson catching both games.

Big Stampede Opens Monday

The Calgary fair and stampede opens on Monday and continues during the week. The attractions exceed anything previously attempted and the attendance will undoubtedly break all previous records. To judge by the general interest shown almost everyone will be there for one or more days between July 6th and 11th.

The Misses Gladys and Florence Woodhull, who have been teaching near Taber and Bow Island, respectively, arrived in Champion on Wednesday morning.

Mr. and Mrs. Geo. Orr and daughter leave on Monday for a two months tour of coast points. The trip will be made by car.

Hot Weather Toggery

Don't sweeter these hot days--get inside of our real Summer Underwear, Hosiery and Shirts. You will think you are down by the ocean side.

Oxford Shoes

Never were Oxford Shoes so popular for men as this year. We can fit you in either black, russet or brown.

CAMPBELL'S

MEN'S WEAR.

Spend Fourth July In Champion

Preparations for July 4th are complete and a big day is confidently looked forward to. Two baseball games between the Calgary Athletics and Champion will provide lots of thrills for the spectators and two real games are assured. A dance in the evening will prolong the day's enjoyment for dance fans. The whole family will enjoy this event so bring them along. It will undoubtedly be Champion's big day.

Don't Forget Short Millinery Course

Please keep in mind the short course in millinery to be held in the union church in Champion on July 9th, 10th and 11th. You will find a poster in the post office, also samples and style cuts posted in the rest room. All lessons are free. There will be a five hour session each day. Two hours in the forenoon and three in the afternoon. All ladies taking the course must provide themselves with needles and thread (coarse and fine, black and white) scissors, thimble, brown paper for cutting patterns, pins, tape measure and scraps of silk, velvet, chiffon, satin, crepe de chene, net lace, ribbon and old foliage and flower centers, also a pencil and scribbler. All ladies and girls of the community are invited. Sect'y W. I. Mrs. Fred Wise.

Crawford's movement

A wedding of very great interest to Champion and district took place at Hillhurst United Church, Calgary, on the afternoon of Tuesday, June 30th, when Mrs. Nettie McGillivray of Weyburn, Sask. was united in marriage to Mr. E. F. Crawford of Champion, Alberta. The ceremony was performed by Rev. J. Y. McGookin, M. A. B. Educ. brother-in-law of the bridegroom while the signing of the register was witnessed by Mr. and Mrs. D. McNeven of Yellow Grass, Sask. The bride who was given in marriage by her brother-in-law, Mr. A. Hollingquist of Calgary was prettily attired in powder blue broadcloth and crepe with hat of silver and grey and wore the bridegroom's gift, a pearl necklace. Her flowers were Ophelia roses. After the ceremony dinner was served in the private dining room of the Empress hotel the only guests being immediate relatives of the bride and bridegroom. The table was centered with a beautiful four tiered wedding cake encircled with mauve and white tulle. The decorations were carnations and mauve sweet peas. After the dinner the wedding party went to the home of Mr. and Mrs. A. Hollingquist from where amid showers of confetti Mr. and Mrs. Crawford left on an extended motor tour through the mountains, the bride travelling in an ensemble of grey kasha with hat to match. On their return they will reside in Champion.

Social at Church Enjoyable Affair

A very enjoyable social took place in the church on Thursday evening. Games were indulged in, and vocal musical numbers given by Mrs. Ryan and Mr. Campbell, with Mrs. Hyndman, Mrs. McLean, Mrs. Latiff and Mrs. Baker assisting while Miss Kathleen Watkins and Miss Jessie Archibald rendered selections on the piano. Dainty refreshments were served by members of the girl's groups, and a generous offering given for some improvements to be made in the parsonage grounds.

JULY 3-4

"PATHS TO PARADISE"

HERE IS POSITIVELY THE BIGGEST LAUGH PICTURE WE HAVE EVER SHOWN

Friday @ Saturday
JULY 3-4

He's in again!--the new comedian favorite--Raymond Griffith. Rushing, chuckling, smashing, dashing along the Paths to Paradise. 50 Paths to Paradise--and every one a laugh. Crooks in clover on the Paths to Paradise. Shoot the Shouts--Loop the Loops--Paths to Paradise. No speed limits--no traffic cops--no gloom--along the paths to Paradise. What a team! What a theme! What a scream! He was so crooked he went to sleep in a French horn. You'll lose all your troubles on the Paths to Paradise. Take a trip to loney Park. Its on the Paths to Paradise. To wealth, laughs, love or thrills--where did the Paths to Paradise lead.

Coming Next Week "The Devil's Cargo."

Place potatoes in pot and cover over with water.

When boiled, drop of water through holes in pot, and potatoes come out perfectly cooked. No boiling or soaking.

These pots are really, whole, perfectly made. Sets with handles on covered dish.

SMP ENAMELED POTATO POTS

Canada's Tied-Up Resources

(Third Article)

In all articles appearing in this column, it is sought to be optimistic and constructive, rather than pessimistic and destructive, because only so can the service of real value to the community be rendered. Having in the previous two articles on "Canada's Tied-Up Resources" outlined the situation which confronts every citizen and lover of this Dominion—and an extremely critical situation it undoubtedly is—some attention should be devoted to finding a solution. If, indeed, one can be found. But found it must be for Canada to not to continue in the doldrums for many years to come, cheated of the part that among the nations of the world which Nature intended (through the variety and abundance of its gifts) this country to occupy.

The first essential to a solution is an awakening of the people of Canada to a full realization of their country's present position in respect to its resources.

A second, and equally important essential, is frankness and courage on the part of public men of all parties in facing and grappling with the problem confronting Canada.

It is necessary that present illiberalized, pet policies, and paralytic nostrums be completely scrapped and relegated to a corner buried past. In stead of continuing to waste time debating in just what manner the stable can be best locked now that the horse is stolen, each interested citizen in Canada should unite with other interested citizens in an endeavor to, if possible, recover the stolen horse.

The battle for and against embargoes, for export duties, on pulp and wool, on waterpower and electric energy, on alcohol and other ores, is being waged with vigor. It is largely beside the mark. At best embargoes and export duties are but half measures and likely to result in reprisals. They do not go to the basic root of the whole trouble, namely, that an enormous amount of Canada's natural resources have passed from Canadian ownership and control into foreign control, and that control is being exercised to the detriment of Canada, checking development, employment, growth of population and industry, and making full prosperity impossible.

The last thing to be advocated in this column is repudiation of obligations, whether national or entered into through private contract. Consequently no such thing is expressed or implied. It must be recognized, however, that when the natural resources of any country—the property of all the people—pass into private ownership and control, there also passes to the new owners an obligation to the people and country who were the original owners. That obligation, expressed in written contract or not, is that the resources in question shall be developed for use of the people as a whole, thereby providing for their wants and advancing the welfare of the country at large. If this obligation is not carried out honestly and to the full ability of the new owners, then the original owners have right and justice on their side in its demand.

With such large issues at stake as the success of our railways, the prosperity of all our industries, employment for our people, increased population and wealth necessary to carry our national burdens and pay off our war debt, with, in fact, the whole future of Canada as an economic and national unit, it is to the balance, the people of the Dominion dare not allow its national and natural resources to remain indefinitely tied up awaiting the convenience of foreign interests for their development for use.

The Dominion Parliament and the Legislatures of those Provinces which have control of their natural resources would be acting well within their undoubted rights if they gave notice to all holders of undeveloped natural resources that development must be begun and prosecuted with vigor, not a mere surface scratching but real development consistent with the nature and extent of the resource held, and that, failing such development within a stated time, title to all such resources would revert to the people as represented by the Crown.

Such action could do no harm as construed as repudiation; it would rather be a proper enforcement of the rights of Canada and the Canadian people, and a very necessary recognition of Canadian manhood and independence and emancipation from a ruling servitude which, if continued, sounds the death-knell of the Dominion.

A Titled Typist

The fancy recently developed by society girls for swilling the army of working women has taken an unusual turn in the case of Lady Constance Howard, elder sister of the Earl of Carlisle. After a period of training in shorthand, typewriting and other essentials, she has gone on for a career as secretary to a firm in London.

The largest simulant cigar ever made was presented to a New York politician. It was twenty-eight inches in length and weighed more than five pounds.

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil. Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher* on every direction on each package. Physicians everywhere recommend it.

Britain Makes Another Payment

Washington Receives Over Sixty-Eight Million For Semi-Annual Interest

The U. S. Treasury received payments from Great Britain, Finland, Hungary, Lithuania and Poland on account of their funded indebtedness to the United States.

The British payment, a semi-annual remittance on interest, amounted to \$68,000,000. It was paid in 78 per cent. treasury certificates with a \$7534 payment in cash necessary to adjust the interest account.

The total payment from Finland, \$132,650, was made in cash. Hungary, under half of its third semi-annual payment of interest, and paid the other half, \$190,650 in cash. Lithuania also paid part of its first annual installment on principal and interest, and turned over to the United States \$73,225 in cash, of which \$46,225 was for interest and \$26,000 for principal. This payment also was in cash.

The first payment on account of the Polish Government amounted to \$500,000, but, unfortunately, \$125,000 was turned over to the treasury last January, and the remainder was remitted on June 15 in cash.

2 Years' Backache

Subdued by "Nervine"

"Backache was the bane of my life, and for two years I was so lame as to be unable to work," writes E. S. Sloan, from Georgetown, "When I finally tried 'Nervine,' I heard of 'Nervine' being a wonderful pain-destroyer, so I decided to try 'Nervine.' Thanks to 'Nervine,' my two years' backache was rubbed out, and I am now perfectly well."

Those who suffer from back, aching, back, those whose muscles are stiff, whose joints are swollen, let them try 'Nervine.' It kills that never fails. 35c at all dealers.

Big Coal Discovery

900,000,000 Tons of Coal in B.C.

The recently discovered coal area at Hat Creek, on the Pacific Great Eastern Railway, north of Vancouver, is declared by investigators to be one of the greatest in the world, and to contain 900,000,000 tons. It is estimated that four square miles of the district are underlain by the coal measures.

BRYAN TABLETS

ALWAYS IN THE HOME

Once a mother has used Bryant's Tablets for a little while, she will always keep a supply on hand, for nothing to equal them in keeping children well. The Tablets are a mild, pleasant, non-toxic laxative which breaks the bowels and eases the stomach, thus relieving the child of all discomfort, colds and simple fevers, and making feeding easier. Dr. J. C. Bryan, M.D., writes: "I have used Bryant's Tablets for the past 35 years and am never without them in the house. They are the best and give the greatest satisfaction and I can gladly recommend them to all mothers of children. The Tablets are sold by medicine dealers or direct by mail at 10c a box. Write to Dr. J. C. Bryan, 'Bryant's Tablets Co., Brockville, Ont.'"

Saskatchewan Postmaster

A. C. Kolb, of Herbert, was re-elected president of the Saskatchewan Postmaster's Association at the closing session of the second annual convention at Moose Jaw, and W. J. Coleman, of Vancouver, was elected vice-president. C. D. Griffith was re-elected secretary-treasurer, and Mrs. R. A. McIntyre, of Regina, was appointed to the executive. The 125th convention will be held at Saskatoon.

Unless worms be expelled from the system, no child can be healthy. Dr. J. C. Bryan's Worm Expeller is an excellent medicine to destroy worms.

New Grain Act

Would Make Provisions Uniform Throughout the Dominion

Concurrent legislation to make provisions of the new Grain Act uniform throughout Canada and place them beyond question on the ground of constitutionality, should be asked of the Provincial Governments, especially those of the western provinces. This is the tenor of a resolution adopted by the agricultural committee of the House of Commons.

The resolution was sponsored by J. L. Brown, Progressive, Ligar, Man. and the Federal Government, take up with the Provincial Governments the advisability of passing such concurrent legislation at the earliest possible date.

The Prince of Wales is now described as "John Bull's Travelling Salesman." What is more, he delivers the goods.

Farthest North Surveys

Department of the Interior Lays Out Plots at Six Posts in Arctic Archipelago

Six different posts in the Franklin District of Northern Canada have now been surveyed for the Royal Canadian Mounted Police or for trading companies as one of the results of the 1923 and 1924 Arctic expedition under the North West Territories and Yukon branch of the department of the Interior.

Plans of these surveys are prepared by the topographical survey branch from the surveyor's field notes for filing with the registrar of the North West Territories. These surveys were made at Craig Harbor, Dundas Harbor, Strathcona Harbor, Ponds Bay, Cumberland Sound and Rice Strait, by P. D. Henderson, D.S.S. The last named post on Ellesmere Island, being only 150 miles from the North Pole, is the most northerly point at which any official survey has ever been made.

For Cans—It is one of the chief recommendations of Dr. Thomas' Easol Oil that it can be used internally with as much success as it can externally. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

Does Your Baby Cry?

Is it nervous and restless during hot weather? If so—most likely his food is not agreeing with him. If you cannot nurse your baby, or if it does not gain upon your breast milk, give him Borden's Eagle Brand Milk—the food that has successfully reared hundreds of thousands of babies. Easy to prepare—just add boiled water as directed.

In this paper from time to time you may find an advertisement of Borden's Eagle Brand Milk, a food that has raised more healthy babies than all the prepared infant foods combined. Get the advertisement and mail it to The Borden Company, Limited, Montreal, and they will send you, free of charge, instructions for feeding your baby, and a Baby Welfare Book and Baby Record Book. Or just write the Company, mentioning this paper, and they will be sent.

Wretched from Asthma. Strength of body and vigor of mind are usually impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy cures. It does not cure the sufferer to normal bodily vigor and mental happiness.

Canal Saves Auto

An auto standing on a street at Phoenix, Arizona, suddenly burst into flames. The owner pulled it into an irrigation canal. The flames were extinguished, another car pulled it out, and he drove off with only slight damage.

Shave in Comfort With Cuticura Shaving Stick

This delicately medicated anti-pruritic shaving stick produces a creamy lathering lather enabling untamed men to shave without irritation, even twice daily. It leaves the skin smooth and free. Makes shaving a pleasant Cuticura is an ideal after-shaving cream.

Send for Free Book by Mail. Address: Cuticura Shaving Stick Co., 1111 Broadway, New York City.

Minard's Liniment For Sprains

SUNDAY SCHOOL LESSON

JULY 5 THE BEGINNING OF FOREIGN MISSIONS

Golden Text: And He said unto them, Go ye into all the world, and preach the gospel to the whole creature. Mark 16: 15, 16. Lesson: Acts 13: 25 to 13: 32. Devotional Reading: Isaiah 52: 1-7.

The Text Explained and Illuminated. The first foreign missionaries were their domestic services, verses 13-15. In the church at Antioch, there were many prophets and teachers, chief among whom was Barnabas. There were also Symeon the Black, an African, no doubt; Lucius of Cyrene, perhaps one of the original evangelists who established the church at Antioch, Acts 13: 29. Menach, the foster-brother of Herod the tetrarch; and Saul, possibly the latest to join the leaders in Antioch. The Herod referred to here was Herod Antipater, whom Jesus described as a "fox." Luke 13: 32, son of Herod the Great. According to Delevant, the foster-brother was a court title of honor, like the phrase "the friend of the ruler" used in the Old Testament. It is interesting to recall in this connection that Antioch, the wife of Herod, was also a follower of Christ.

In the days of the apostles, and even Christianity was a proscribed religion, the body of the membership was in the control of the emperor and middle ranks of society. The reality and noble will always be low in comparison with others in the church, for this is for no other reason, than the "fear of them" (Dr. James Orr).

Speculate On Canada's New Governor-General

Officials in London have already formed definite views as to the qualifications necessary for the important and responsible post of governor-general of Canada. The name of Prince Henry is again being mentioned, and it is noteworthy that he alone of all the Princes was present with his august father when the latter opened the new Canadian building on Monday, June 29, while his interest in all things Canadian has been patent for some time past. One thing can be said with regard to his appointment, if Canada has any particular predilection for any particular person, it is only to explain his preference in order to have it carried into effect. It is admitted that it will be a difficult task to find a man out of the royal family who is not only well qualified by intellect and preference to make the bonds between the motherland and Canada more secure.

Canada's Problems

Sir Robert Falconer, Addresses Educationalists at Dinner in London

Many educationalists of note attended the dinner given by the Canadian Club of London in honor of Sir Robert Falconer, president of the University of Toronto.

Three great problems were: First, the internal unification of the Dominion; second, her future position in the world; third, the problem that Canada is served in her attitude towards Britain and the empire.

The army and maritime provinces are just now loudly expressing discontent and it is certain that they have received less from consideration than their legitimately deserve, is stated.

House Of Commons

Makes Decision

Holds Fleas Are Not Trained Animals Within Meaning of Act. After lengthy debate the British House of Commons has decided that trained fleas are not trained animals within the meaning of the act animals.

The commons were further decided that fleas could not be trained at all, and then wound up the argument by deciding that fleas are not animals.

Grain Inspections at Calgary

Since the beginning of the present season, approximately 25,000,000 bushels of grain have been inspected at Calgary. Of this quantity 2,700,000 bushels were wheat.

Soft corns are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

The most perfect form of battery is to say to people what they think of themselves.

Very often a sound investment is just a bit of speculation that turned out all right.

Minard's Liniment For Neuralgia

Hello Daddy—don't forget my Wrigleys

Slip a package in your pocket when you go to bed. It will come to you in the morning.

Give the youngsters this wholesome habit-forming treat. It's a pleasure and benefit.

Use it yourself after smoking or when you're tired. It's a great little treat.

WRIGLEY'S JUICY FRUIT CHEWING GUM

800 TIGHT

Warren Harding Memorial

Statue to be Unveiled at Vancouver

An international memorial which in many ways is unique, will be unveiled in Vancouver on September 17 next, to perpetuate the remembrance of the late President Warren G. Harding's visit to Canada on July 10, 1923. The statue was first ordered to be built by a committee acting on the initiative of the Kiwanis Club of Vancouver, the subscription list for it was open to clubs in the United States as well, with the result that the objective of \$35,000 was soon over-reached and the United States clubs insisted that they bear the entire expense, the amount subscribed by the Canadian clubs being returned to them.

The memorial will mark an event of which history offers no duplicate—that of a United States president making an address on Canadian soil during his term of office. President Harding visited Vancouver for a few hours on his way south after visiting Alaska in July, 1923, and was given an impressive reception. His address, in which he made an eloquent plea for continued friendship between the English-speaking peoples and practically between Canada and the United States, was listened to by over 20,000 people and aroused considerable interest throughout the British Empire.

Aeroplane Will Be Speedy

Four Hundred Miles Per Hour Is Claim Of German Inventor

An aeroplane, said to be capable of speed of 400 miles an hour, is being built and will be entered into the races for the Pulitzer trophy next October, according to Dr. Otto A. Koller, German aeronautical expert, now in Germany.

Dr. Koller, the inventor, said his airplane will be equipped with an 800 horsepower engine with a total wing spread of 36 feet.

Life was safer than any the book was done by guess.

THURSDAY, JULY 2, 1925

NOTES AND COMMENT.

The egg inspector was here recently looking over local observance of the act respecting this class of produce. Later on good authority it is stated that the great majority of eggs reaching the market have not been handled in accordance with the act.

The equalization of freight rates which is to be undertaken by the railway commission is not popular with the western members of parliament, with the exception of British Columbia. The general impression seems to be that any advantage will go to the east.

Following the Saskatchewan elections which were strongly liberal Nova Scotia follows abandoning liberal tendencies many years ago to almost solidly conservative. Both were provincial elections and as such may have little weight when federal matters are under consideration, but in each instance partisans have endeavored to construe the provincial results the other way.

Generally speaking present prospects exceed anything experienced in many years. Even the prices of wheat has been affected by the extent of the crop prospects in the three prairie provinces.

Stubble-in crop has looked almost as well as summerfall this year but the weeds are making their presence known in no uncertain terms now.

The modern housewife's life is too easy, Dr. Guy E. Manning told the convention of the American Institute of Homeopathy. "Labor saving devices are making her lazy," he said. "If the doctor would try looking after a house with two or three children in the family he would soon change his tune.—Alberta.

NEWS NOTES

The new gas well brought in by the Canadian Western Gas Company in the Foremost field in Southern Alberta has a production of 11,000,000 cubic feet. The drilling of this well to a depth of 2250 feet was completed in 43 days.

An editor received this letter from a fresh youth: "Kindly tell me why a girl always closes her eyes when a fellow kisses her."

To which the editor replied: "If you will send us your photograph we may be able to tell you the reason."

Owing to the destruction caused by cutworms, D. K. Bowman, near Gopher Head, harvested his wheat and immediately checked their further progress, and the grain is now looking better than before. If more people would cultivate their land where the cutworms appear, they would be checked. The crops in the Wolf Hill district are being damaged by wire worms and in some cases whole fields have been destroyed.—Stettler Independent.

Real service is not a kind of stock in trade that can be merchandised in the open market. It accompanies a commodity, yet is not a part of the purchase. It bears no price tag but is given without expectation of reward.

Indimensional, intangible, it is almost indefinable. It consists, in part, of contrived intelligence, experience and judgment, of counsel unselfishly directed, of profitable ideas and suggestions, of extra painstaking for correctness in details that might not be noticed. It includes the hours of effort and attention for which you do not pay. It implies the understanding, anticipation and prompt fulfillment of your needs. In all, it is the altruistic, enthusiastic spirit of helpfulness in action.

During the past week two important conventions have been held in Edmonton, one being the convention of the Dominion Seed Growers, and the other the annual meeting of the Canadian Society of Technical Agriculturists. Two prominent lecturers at the latter were Prof. Ervay of Iowa State College and Prof. Hoagland of the University of California. There was a large attendance of delegates at both conventions from all parts of Canada. The Alberta directors for the seed growers association are W. J. Stephens of the Department of Agriculture, and Major Strange, 1923 world wheat champion.

An over-payment of \$500,000 by the Dominion Government authority to the Province of Alberta on cash subsidy account during the years 1910, 1917 and 1918, has been discovered, and a claim has been entered for repayment of this from Alberta. The over-payment was the result of a clerical error in Ottawa in computing the payments to this province on a basis of population. The matter is now the subject of negotiation between the provincial and dominion authorities as to the method of repayment.

Fight the Weeds

Following a visit from district weed inspector Shuttleworth the following circular letter has been issued to the farmers of the municipal district of Harmony:

Champion, June 15, 1925.

Dear Sir:

The Councilors of this Municipality are asking everyone to make a special effort this year to keep the weeds well under control. Mr. T. R. Jopling, of Champion, has been appointed to see that the "Noxious Weeds Act" is lived up to. The Councilors very earnestly ask you not to wait till this man calls on you. Let us clean up this weeds, not because we have to, but because they rob our fields of moisture and nourishment, cause extra and needless labor and lower the value and name of our farms and our Municipality.

The Councilors ask you to note Clause 4 of the "Noxious Weeds Act."

"Every owner or occupant shall destroy all noxious weeds on the lands he owns, occupies, or has the right to occupy, and on the area between the boundaries of the said lands, and the centre line of all contiguous roads and road allowance, and if he makes default in so doing he shall be liable on summary conviction before a justice of the peace to a penalty of not less than five dollars and not exceeding fifty dollars and costs."

You are responsible for the weeds up to the middle of the road, growing on the road allowance adjoining your land. Move them before they seed. In the case of stink weed spread straw and burn. Do not wait until neighbor "Smith" or "Jones" cleans up his fence corners, road allowance and summer fallow. Clean up your own place because you are too good a farmer to do otherwise. If we wait for the other fellow no one will ever start.

You take the lead—Watch the effect on the other fellow.

Yours for better, cleaner, more productive, and more valuable farms.

REEVE AND COUNCILLORS OF YOUR MUNICIPALITY OF HARMONY.

The total yield of potatoes in 1924 in Canada is estimated at 56,648,000 cwt. from 561,628 acres, as compared with 55,697,000 cwt. from 560,942 acres in 1923.

Easy Book-keeping For Farmers

The Dominion Experimental Farms system has published an extremely simple farmer's account book. In size and thickness it is no larger than a school exercise book, and is designed to last a complete year. To "keep" it costs no money and knowledge of accounting simply the ability to write and add; and a record of all transactions might be made in an hour a week. A few plain directions as to making entries, some aids to taking inventories, a table of silo capacities and a gestation table, are given on the inside of the cover.

In the book itself are pages for the entry of receipts and expenditures (both of which may be seen at a glance on the same page) relative to cattle, horses, sheep, swine, poultry, crops and labour; and there is also ample space for miscellaneous items. There is a page for amounts owed to and by the farm, and forms on which may be made inventories of land and buildings, of live stock, of feed and supplies, and of machinery. Following is a page on which may be filled out a summary of the year's business, together with the four directions a farmer is to fill it out intelligently at the end of the year. Further, for the farmer's information there is a table in which to enter acreage and yield of crops, and one in which to keep a live stock service record.

The whole thing has been reduced to the simplest possible terms, and is a most useful publication.

It is obtainable from the Publications Branch of the Department of Agriculture, Ottawa, at a nominal charge of ten cents. No postage need be placed on letters of application.

S.A. League Baseball Schedule

Champion vs. Vulcan on Wednesday, July 15—Vulcan vs. Champion, at Vulcan.

COAL!

THAT BURNS ALL NIGHT

Lee Smith Mine

The deepest, mine—the hardest and best coal mined in the district.

If you haven't tried this coal order a load now—anyone who has used it will tell you how good it is.

Lump, \$5 per ton at mine.

Nut, \$1.50 per ton.

Can supply all demands after Sept. 15th.

Smith & Popovich,

PROPRIETORS

Canadian coals yielded in 1924 the total of 411,007,000 bushels from 11,491,280 acres, as compared with 565,007,500 bushels from 11,387,807 acres in 1923.

A Want Advt.

Will Do It!

For Trade or Sale

Registered Percheron Stallion. Apply to Neil McLeod, Phone 111, Champion.

Barn For Sale

Barn 12x20 feet, shingled roof. Cheap for cash. Apply to W. C. Hoskins, Phone 12, Champion.

For Sale

Racon type Tamworth Boar, bred at University, Edmonton, 2 years old. Apply to J. N. Hill, Phone 80, or Hill's Meat Market, Champion.

TRACTOR FOR SALE

Fordson Tractor, good as new, cheap for cash. Apply to C. M. Granlin, Ford Garage.

For Sale

A quantity of household furniture, including Piano, Refrigerator, Davenport, Hupmobile, etc., the property of E. Ellis. Apply to Fred Clever, Champion.

For Sale

Weaner pigs and sows to farrow. Apply to Anderson Bros., Champion.

For Sale

Smith Foxcar-Truck, in first class order. Price \$225. Apply to Neil McLeod, Phone 111, Champion.

billiards

A billiard game always provides every well conducted billiard room. Indeed, every billiard table in a properly managed recreation center fairly radiates civility and good fellowship.

Give billiards a trial on our table. Meet new men. Broaden your field of opportunity. You will be impressed with the excellence of the equipment we have provided for the enjoyment of this fascinating game. You also will feel right at home when you sense the atmosphere of wholesomeness and refinement that always is so evident in this recreation center.

U. G. ANDERSON

Proprietor.

Man, Your Lucky!

We'll all admit that its hot outside, **BUT** do you realize that your wife is working in that same heat with a nice little fire in the range and a house that lacks those breezes we get out doors. A small expense will remedy this condition.

Round Oak Oil Stoves

Will cook those meals without odor and leave your home cool and refreshing. Ovens that will bake make this equipment complete.

Coleman Gasoline Camp Stoves

Are wonderful for a quick meal and can be used inside or outside.

Refrigerators

Will keep your butter firm, your meats sweet and delicate. Their cost is saved in eatables which would otherwise be spoiled.

Ice Cream Freezers

Are always in demand in hot weather. Ice cream is always delicious and healthy, especially during the hot weather.

PROPRIETOR.

Introduction Of Garnet Wheat May Be Fraught With Great Possibilities In Future

The Dominion cerealist, recently addressing the agricultural council of the House of Commons, speaking of a new wheat developed at the experimental farms, made the following statement: "The production of Garnet wheat may possibly in the near future replace the famous Marquis wheat. This new wheat has capabilities of high resistance in seasons of drought, ripens earlier than Marquis, even in wet years, thereby reducing the possibilities of rust and rot, and it is hoped that Garnet wheat may extend the wheat growing area many miles farther westward."

In an appreciation of Marquis wheat, it is difficult to grasp the full significance of this. Marquis wheat, developed by Charles Saunders, who was recently granted a pension of \$5,000 per year by the Canadian Government for his invaluable services to the continent's agriculture, and was awarded the gold medal by the Royal Society of Canada, has to some extent revolutionized wheat growing in America. In the past twenty years it has placed millions of additional dollars in the pockets of the wheat-growers of the United States. The state market forces attention to what has been accomplished in wheat growing in Western Canada.

The development of the new wheat of the west into a productive territory is as familiar as the history of the Empire's wheat has been rapid and sensational. In the early eighties, when the Canadian Pacific Railway brought its steel arteries to the government and railway advertised the area as a grain-growing territory, the possibilities of wheat production were regarded very seriously, and many authorities stated deprecatingly that it would never be produced economically there. It was not until a few years later, Canadian wheat secured a market of 22,500,000 and the estimated spring wheat production 271,822,000 bushels. This compared with an acreage of 5,529,000 and a production of 872,672,000 in the United States in the same year. Canada's yield in the past year was equal to nearly 12 per cent of the world's wheat crop grown in 21 countries, as recorded by the International Institute, as against 22 per cent in that of the United States crop.

In 1911 Canada first entered the international lists with her wheat, since when she has fallen in only one year in early ways the wheat-growing ship, when she had the consolation of knowing that the winning Montana farmer had produced his crop from Canadian seed. The yield of wheat in Canada is consistently higher than in other countries of similar climate. The world's largest wheat crop was grown in Alberta in 1922, when 108,410,000 bushels were produced, 5,503,261 acres, an average of 28 bushels to the acre and weighing 51 1/2 pounds to the bushel.

Milk Good For Poultry

Kept Fowls Healthier and Acts As A Tonic
Is milk a substitute for a 20 per cent. milk mash as is usually advised? According to the results of an experiment conducted by the poultry department at South Dakota State College, it is. "If a farmer has milk, it is ought to feed some of it to his chickens," states G. L. Stevenson, head of the department. "Milk can be fed to chickens to better advantage than to hogs and other calves. Furthermore, it will pay anyone to buy milk for the young chicks." The results of the experiment show that although milk is a substitute for meat mash both the meat mash and the milk have to be supplied in equal amounts to supply the necessary protein to the chickens for less cost. The point in favor of milk mash is that it keeps the fowls healthier. The lactate acid in the milk seems to act as a tonic.

Easily Explained

Two Irishmen stood in front of a drug store in Dublin. In the window was a display of rubber gloves. "Now I wonder what in them things for?" asked one of the Irishmen. "They're for the other Irishman," replied the other Irishman. "Ye can put them things on an' wash yer hands without getting yer hands wet."

Life on the Inland Island of the British Empire

German ambassador, Trieste da Cunha, is a strange affair. During his visit to the Netherlands, but seen dated with men and women with women, saw on very special occasions.

Enthusiasm sometimes carries people away only to leave them to return to disgust.

W. N. O. 2563

Why Barley Is Bearded

Provision Made by Nature To Protect The Grain

In nature there is a reason for everything, even though we may not be clever enough to find it. Since your first encounter with barley beards, you may have asked what purpose those things could serve.

Recently Joe Robinson, a farm crop expert at the Iowa State College, answered the question by pointing out a remarkable thing in developing a "bearded" cereal. He has been accumulating facts, have been accumulating facts, have been accumulating facts, why a satisfactory beardless barley could not be found.

As anyone knows who has had her hands in his clothing, they are very brittle and scratchy, readily breaking into tiny pieces, each capable of inflicting a painful scratch in the skin. This brittleness is due to the high percentage of silicon in the beards. Now if the beards are removed the silicon continues to be collected by the plant in the absence of the awns or beards, this material is left in the straw and is available in the little stems that attach to the grain.

Of course, there are beardless varieties of barley, but as yet they have not given general satisfaction. It seems the nature intended barley to have a beard and any attempt to remove it throws the plant out of balance.

Use Canadian Coal

Government Would Envisage A Scheme To Relieve Fuel Shortage

An important statement was made in the House of Commons recently by George F. Graham, minister of mines, in which he pointed out the debate on the export of power from Canada. The statement dealt with the fact that the coal mines of Ontario and Quebec now in operation of coal from the United States. He spoke as follows:

"I am glad to say that our discussions are temperate in this matter. We in Ontario and a portion of Quebec and the Atlantic provinces are largely for our coal upon the United States. Our anticlinal has been brought in from the United States, and year after year we have been scarcely we send our representatives over there to see that we get a square deal and to see that the coal is sold at a price which is fair to us."

He then said that the coal is sold at a price which is fair to us. He then said that the coal is sold at a price which is fair to us. He then said that the coal is sold at a price which is fair to us.

Experiment With Cucumbers

Pickle Plant May Be Established In Southern Alberta

Experimental plots have been planted to cucumbers in each of the 100 in the Leithridge northern irrigation district, to determine whether or not this vegetable can be grown successfully and in large enough quantities to justify the establishment of a pickle plant in Taber or in the immediate neighborhood. If the cucumbers can be grown at a profit, Charles H. H. of Spokane, Washington, plans to set sixty acres and arrange for the erection of a pickle factory next year.

Place of Modern Life

Dr. Charles Mayo says the pace of modern life is so fast that many people-day life. No doubt the doctor is right but he fails to tell us how we may succeed in keeping pace so easily. The road to achievement is paved with hard work and unremitting attention to business—Borden Clarks.

Hospital Cars On Trains

The Canadian Government has decided to install hospital cars on all the trains of the national railways to carry out the national policy of becoming sick while on a journey or who are travelling while seriously ill.

Wireless Torpedo Invented

To construct the pilotless aeroplane, an aerial torpedo has been invented. It is claimed that the torpedo could be made to pursue its way through the pilotless aeroplane through wireless control.

Hydraulic control was used in ancient Rome by mixing and baking lime and volcanic ashes.

When a girl in Inverness doesn't carry her letters in her pocket.

Growing Frost-Resistant Corn

Michigan Professor Has Been Experimenting For Three Years

Some Nature fooled again! This time the grand old lady and her son, Jack Frost, have been outwitted by Professor J. R. Duncan, agricultural college, who has succeeded in growing frost-resistant corn.

A frost-resistant corn will mean millions of dollars in the pockets of farmers throughout the world. It will be a boon to farmers in our north-western states, especially those in the north with climates similar to Upper Michigan, Minnesota, Wisconsin and North Dakota.

On this account, every precaution should be taken to keep these plants of the animals in prime condition.

The first essential is the well-tilling of the soil. Next, after the well-tilling of the soil, comes the clean culture. It is essential that the soil be kept free of weeds and grass. A little salt at the rate of one-half pound per acre will do the trick. A little salt at the rate of one-half pound per acre will do the trick.

Should Make Thorough Job

Sheep Should Be Examined For Vermin After Clipping

Many sheep farmers wonder why their sheep get rid of ticks and similar vermin. If they would take time to examine their sheep shortly after the usual clipping, and look carefully into the little folds of the skin, they would find them very close to the skin. They would find them very close to the skin.

It is the duty of the sheep farmer to keep the skin healthy and free from vermin. It is the duty of the sheep farmer to keep the skin healthy and free from vermin. It is the duty of the sheep farmer to keep the skin healthy and free from vermin.

Canada Attracts English Girls

Many Have Sufficient Money To Start Farms Of Their Own

Emily Binder, a graduate of the experimental farm of Leeds University, in Winnipeg is the latest of a number of Canadian agricultural students, with a view to creating, on her own, a domestic turkey industry in Western Canada of English girls.

She plans to start on the farm in all parts of the world. She plans to start on the farm in all parts of the world. She plans to start on the farm in all parts of the world.

Passes Another Clean Test

Renewal Certificate Received For Large Herd In Quebec

R. R. Noss and Sons, Hawick, Que., have recently received a renewal certificate for their herd of 29 Black and White Holsteins. The herd has been successfully passed its yearly test for tuberculosis. The herd has been successfully passed its yearly test for tuberculosis.

Canada's Standing Timber

The total stand of timber in Canada is estimated to comprise 182,000 million feet board measure of saw material, and 1,280 million cords of pulpwood. The total stand of timber in Canada is estimated to comprise 182,000 million feet board measure of saw material, and 1,280 million cords of pulpwood.

A Delusion

Cheerfulness—The outlook you seem smaller than the kind you gave last year.

Waiter—Merely a delusion, sir. I have enlarged the place since last year.

Remarkable results were obtained from a new glass recently tested in London. This allows the health-giving ultra-violet rays of sunlight to pass so that patients may derive the full benefit of sunshine treatment without going out of doors.

Messages can be transmitted at the rate of 20 words a minute in each direction at the same time over a new trans-Atlantic cable between New York and Rome.

Homesteading Is Still A Very Important Phase Of Western Land Settlement

When Horses Should Have Special Care

Harvest Season Unusually Hard On Horses and Shoulers

Horses will soon be on the moving machines, and later will be doing their share on the self-riders. Perhaps no work that the horses are called upon to do is harder on the necks and shoulders than these very operations.

The first essential is the well-tilling of the soil. Next, after the well-tilling of the soil, comes the clean culture. It is essential that the soil be kept free of weeds and grass. A little salt at the rate of one-half pound per acre will do the trick.

It is gratifying to find that the English-speaking nations continue to preserve their majority in Western Canada land settlement. Though some of the nationalities are represented in the settlement, the English, Canadians led with 1,277 entries, followed by citizens of the United States.

The British Isles with 578, these three classes accounted for nearly 70 per cent. of the total registrations. The English-speaking nations continue to preserve their majority in Western Canada land settlement.

There has been an unquestionable growth of the great agricultural tract of the western half of the continent. It is estimated that the land has been settled in the last year to the extent of 1,277 entries.

Origin of the Turkey

Domestic Bird Originated From The Common American Wild Turkey

It is generally supposed, says the poultry inspector of the Dominion experimental farms, in his bulletin on the care and management of turkeys, that the domestic turkey originated from the common American wild turkey, which was the largest of the wild fowls, although some writers claim that the origin of the turkey is the most popular in Canada, came from the Mexican turkey because of its habit of eating and white man's turkeys on land and sea coverts. It can not be denied, says Mr. A. G. Threlk, the poultry inspector, that the turkey has been introduced into the Dominion of the American wild turkey due to the crossing of wild turkeys with domestic turkeys. There are more than half a dozen breeds of the birds, the principal of which are the Bronze, White Holland and Narragansett.

Other breeds are Black, Slate and Bourbon Red. Standard weights of the adult cock are: Bronze 26 lb., White Holland 28 lb., Narragansett 28 lb., Black 26 lb., Blue 26 lb., Slate 26 lb. and of the hen: Bronze 20 lb., White Holland, Narragansett, Blue and Bourbon 18 lb., Black 18 lb. Mr. Taylor is also authority for the statement that there is little difference in the hardiness of the breeds and that the death of all turkeys is very similar both in texture and flavor.

Hog Feeding Experiment

Self-Fed and Trough-Fed Hogs Compared

In feeding experiments with Berkshire hogs, conducted at the Central experimental farm, tests have been made to determine the relative merits of self-feeding and trough-feeding. According to the report of the Dominion animal husbandman for 1924, in these tests the self-fed hogs made the greatest gain, but they consumed more feed and cost more per pound of gain. They were thicker and heavier than the trough-fed hogs, but the latter produced a more desirable type of bacon carcass.

Was Playing Safe

Little Bobby was interested in canine and feline everything to come and go. He wanted to know what the cat was doing.

One morning his father heard sounds of hammering coming from the garden, and on looking out he saw Bobby busily at work on his favorite pastime. Besides him was his little sister, Mary, apparently looking on as a mere father.

"Have you told you, Bobby, that you will smash your fingers if you keep on driving nails into things?"

"Yes, I know," said the sage young man. "But I'm holding the nail."

Should Not Be Strange

The Archbishop of Quebec says Cardinal Beilin calls on him every year and he calls on the cardinal, and relations are courteous and friendly.

It is that it is required by some newspapers as a fine example to other newspapers. A resident of Mary might think that such a statement of charity might be taken for granted that two distinguished followers of the cross would so cordially meet and maintain friendly and courteous relations. —Chatham News.

That homesteading is still an important phase of Canadian land settlement

and that the day of the settlement of the western half of the continent is over, though lying farther and farther from existing railway lines each year, is made evident in the last report of the federal department of the interior. This shows that in the last fiscal year a total of 5,842 homestead entries were made in Western Canada, 1,639 being in Saskatchewan, 1,326 in Alberta, 322 in Manitoba and 165 in British Columbia. A homestead consists of a quarter section of 160 acres of land, so that this method of land acquisition alone in the past year resulted in the settlement of 614,960 acres. To this should be added soldier homestead grants which made an additional 112,600 acres, bringing the total number of acres given from government land in Western Canada to 727,560 acres. This is not a bad showing in view of the state of immigration in that year and the retarded action towards land settlement.

It is gratifying to find that the English-speaking nations continue to preserve their majority in Western Canada land settlement. Though some of the nationalities are represented in the settlement, the English, Canadians led with 1,277 entries, followed by citizens of the United States.

The British Isles with 578, these three classes accounted for nearly 70 per cent. of the total registrations. The English-speaking nations continue to preserve their majority in Western Canada land settlement.

Local and General

Mrs. Kealey, of Brant is the guest of Mrs. W. C. Hoskins.

Mrs. Bud Roberts left for Spokane on Wednesday night.

Born—On Tuesday, June 30th, to Mr. and Mrs. F. Dalsin, a son.

The town was quite gay with bunting on July 1st, almost everyone contributing a flag.

Smith Bros. shipped a mixed car of stock to Calgary on Wednesday last week.

Mrs. Oscar Hagg left on Thursday last for Kent, Wash., to spend the summer.

The school was closed on Tuesday, all the examinations having been completed.

All the sentences imposed upon Home Bank officers have been quashed by the Court of appeal.

The telephone exchange is now resplendent inside and out as the result of paint and kalsomine.

Mrs. C. Williamson, and Ada left for Banff on Tuesday where they will spend the month of July.

Mr. Edwards, of the Canadian Bank of Commerce staff left for Edmonton on Tuesday, where he had been transferred.

Hail on Wednesday afternoon is reported to have damaged crops from the vicinity of Brant to north of Reid Hill.

Gunder Nerison was the victim of a nasty fall in the new ditch in front of his premises. A badly sprained wrist resulted.

During July and August the services in the church will be shortened somewhat, and the church made as cool as possible.

Miss, Ethel Poirier of Carstairs spent the week-end with her brother, Mr. Harold Poirier, teacher of the Fireguard school.

Lost—On Wednesday evening a bunch of keys and on Tuesday a Swan fountain pen. Finder please return to Chronicle office.

Mr. and Mrs. R. R. Mason, of Olin, Iowa, visited Mr. and Mrs. D. Watkins and Mr. and Mrs. F. Clever during the week. They are now in Calgary visiting other relatives.

Mr. and Mrs. A. E. Lockerbie and two little daughters, who had been visiting Mr. and Mrs. C. Hyndman left for home on Tuesday morning. Mr. Lockerbie is Mrs. Hyndman's brother.

The new ditch on the old road to the station resulted in a quite serious accident to Forrest Cool's car, the front end of which was badly damaged by running into the ditch after night.

The baseball team was badly beaten at Brant by Valeau on Friday the score being so large as to be almost unprintable. Those who attended the celebration report having had a good time.

On Saturday evening at six o'clock a distinct earthquake shock was felt in this vicinity. It was not noticed by many who were on their feet but was quite distinct in buildings. A slight shock was also noticed at 4 o'clock.

The Legislative Council of Yukon Territory has amended the ordinance of that Territory which regulates the practice of medicine and the like by adding the following clause: "Nothing in this Ordinance contained shall apply to or affect . . . persons treating human ailments by prayer or spiritual means as an enjoyment or exercise of religious freedom." Thus, Yukon joins Saskatchewan, Ontario, Nova Scotia, and most of the United States in explicitly recognizing the practice of religious healing.
